

IN 1984 ►

Rho began as a private company providing statistical analysis and data management services and, since then, has grown into a full-service contract research organization (CRO). Rho has supported 100+ pharmaceutical, biotechnology, and medical device companies taking their new products and devices from concept to submission.

IN 1995 ►

Rho established Rho Federal Systems Division (RhoFED) to recognize its increasing interest in providing services to the U.S. Government. Our unique mix of federal and commercial projects has made us a strong partner to a myriad of Government clients.
