

## U.S. General Services Administration (GSA) OASIS and OASIS Small Business Contract Program and Rho: Proven Clinical Solutions Delivered at the Speed of Your Need

**OASIS provides experienced contractors, small business capabilities, flexible ordering methods, and more!**

- The GSA One Acquisition Solution for Integrated Services (OASIS) program is a multiple-award IDIQ program open to all federal agencies that provides access to pre-vetted, mature, and federal market-proven professional services contractors
- Designated by OMB as a Best-in-Class solution, OASIS is a preferred contract vehicle that has a proven track record of assisting federal agencies in meeting their spend under management goals
- OASIS Small Business (SB) and OASIS unrestricted pools allow agencies to conduct small business set-aside acquisitions, helping federal agencies meet their small business goals
- Streamlined acquisition procedures under FAR Part 16.5 alleviate the need for synopsis and posting solicitations to SAM.gov and conducting FAR Part 15.3 source selections
- Supports all contract types at the task order level, including firm-fixed price (FFP), time and material (T&M), cost-reimbursement (CR), and hybrid contract types
- Provides maximum flexibility for ancillary support components (labor, materials, and other direct costs)
- HHS has conducted over \$550M in purchases via OASIS and OASIS SB contracts from 2017 through 2021. The NIH accounts for approximately 10% of the HHS total purchase via OASIS and OASIS SB contracts. OASIS provides direct clinical and other professional services sought by HHS Agencies and Offices (i.e., NIH and BARDA) in partnership with established industry partners
- GSA provides dedicated support to federal agencies for navigating the OASIS and OASIS SB contracts programs
- OASIS and OASIS SB allow agencies to conduct acquisitions in days or weeks vs. months for open market acquisitions. Customers can move even faster by using the GSA E-Buy system! Task orders can be competed among selected contractors, reducing Procurement Administrative Lead Times (PALTs). Conforming OASIS orders under \$25M can't be protested, reducing time and effort.

**Rho, a full-service CRO providing clinical research services to Federal clients for over 25 years, is a GSA OASIS SB professional services contractor in Pool 4 for research and development in the following NAICS codes:**

541715	Research and Development in the Physical Engineering and Life Sciences
541714	Research and Development in Biotechnology
541713	Research and Development in Nanotechnology

# Experience, Rho.

Full-Service CRO | Small Business | Experienced Federal Contractor

DUNS No.: 362726007 • CAGE Code: 8A1W7 • OASIS SB Pool 4 Contract No.: 47QRAD20D4064 • [www.rhoworld.com/federal-programs/](http://www.rhoworld.com/federal-programs/)

A privately held contract research organization (CRO), Rho provides a full range of clinical research services across the entire drug development process. Since 1984, Rho has been a trusted partner to some of the industry’s leading pharmaceutical, biotechnology, and medical device companies as well as government and academic organizations. Our unique mix of federal and commercial project experience and flexible service offerings has made us a strong research collaborator for a myriad of government agencies. Rho has served as the coordinating center under federal prime award for 19 research programs through multiple award cycles, some partnerships spanning as many as 20 years.

**Whether you require program-wide clinical research coordinating centers, full-service study management, or functional services support, Rho’s robust suite of services will support your research goals.**

## CAPABILITIES
